EDUCATION

University of South Florida
Bachelor of Science in Computer Science

Tampa, FL
Expected December 2026

Pasco-Hernando State College
Associate in Arts

New Port Richey, FL
Aug 2021 – July 2023

EXPERIENCE

Computer Science Intern
SOFWERX

Aug 2025 – Present
Tampa, FL

- Design, prototype, and test software systems supporting innovative solutions for U.S. Special Operations Command (USSOCOM).
- Build and deploy cloud-based applications and AWS infrastructure, using Amazon Cognito user pools to enable secure authentication and role-based access control.
- Configure and extend REST API integrations to support protected data submission workflows and improve system scalability.
- Collaborate with subject matter experts and contribute to weekly market research to identify emerging technologies for future warfighter capabilities.

Data Science Intern

June 2025 – Aug 2025
Tampa, FL

General Dynamics Information Technology (GDIT)

- Developed a full-stack web application using Flask, React, and Tailwind CSS to monitor real-time data from multiple sources.
- Built interactive dashboards and visual reports with customizable filters to support data-driven insights for internal stakeholders.
- Integrated AI-powered summarization and semantic search features to improve content discoverability and analytical efficiency.
- Presented technical updates and progress reports to supervisors, aligning development with internal use cases and stakeholder feedback.

Retail Sales Associate

May 2021 – Aug 2025
Tampa, FL

Nike

- Delivered high-quality customer service and supported team efforts that contributed to a 6% increase in overall store sales.
- Operated point-of-sale systems, managed transactions, and maintained accurate inventory through restocking and audits.

PROJECTS

Civil | *Next.js, React, TypeScript, Tailwind CSS, Python, Supabase, PostgreSQL, Mapbox, OpenAI API*

- Developed and deployed a full-stack public records platform that enables users to search, filter, and view local development projects and permit records.
- Integrated Mapbox and public GIS parcel data to display project locations, parcel context, and development activity through interactive project detail pages.
- Built automated data ingestion workflows using Python, PostgreSQL, GitHub Actions, and the OpenAI API to collect, classify, normalize, and organize public permit records.

TECHNICAL SKILLS

Languages: Python, TypeScript, Java, JavaScript, C/C++, SQL, HTML/CSS

Frameworks & Libraries: React, Next.js, Flask, Tailwind CSS

Cloud & Databases: AWS, PostgreSQL, Supabase, Firebase, Vercel

Tools & APIs: Git, GitHub Actions, OpenAI API, REST APIs, Mapbox
